

Webroot Threat Intelligence Platform

1 INPUT:
Millions of Real-World Endpoints

2 MACHINE LEARNING:
Highly Accurate, Massive Scale

3 CONTEXTUAL ANALYSIS:
Correlates IPs, URLs, Files, & Mobile Apps

4 SERVICES:
Collective Threat Intelligence

5 CONTINUOUS LOOP:
Self-improving

1. Input

Millions of Customer and Partner nodes act as real-time global internet sensor network

2. Machine Learning

Infinitely scalable & geo-redundant advanced cloud architecture

3. Big Data Analysis

Automated machine learning & more than half a trillion new objects per day of constantly added threat data

4. Services

Powered by Webroot Threat Intelligence Platform incorporating BrightCloud Threat Intelligence Services

5. Continuous Feedback

Real-time feedback loop of collective threat intelligence increases predictive effectiveness
